TECHNICAL SKILLS

Cloud Platforms: Azure (primary), AWS, GCP
CI/CD Tools: Azure DevOps, GitHub Actions, Jenkins, Docker, Kubernetes, Docker Swarm
Configuration Management: Ansible, Terraform, Docker Compose, Helm Charts
Programming Languages: Python, C#, Bash/Shell, Java, Kotlin, JavaScript
Databases: PostgreSQL, MySQL, SQLite, MongoDB, Azure SQL
Monitoring Tools: Prometheus, Grafana, Azure Monitor
Networking: TCP/IP, DNS, VPN, Firewall configuration
Operating Systems: Linux (Ubuntu, CentOS, Fedora, Rocky Linux), Windows, Windows Server, macOS
Version Control: Git (GitHub, GitLab, Azure DevOps Repos)
Frameworks: .NET Core, Django, Flask, FastAPI

DevOps Engineer, Veeder-Root

Simsbury/Remote, CT 2025 - current

- **GitHub Migration:** Architected and automated a full repository migration from SVN and Bitbucket to GitHub, preserving all commit history, tags, and branch rules; leveraged the GitHub API to programmatically reassign ownership to original repository maintainers.
- **Pipeline Rebuild:** Rebuilt all Bitbucket CI/CD pipelines in GitHub Actions, maintaining feature parity and improving maintainability across the organization's delivery workflows.
- **Jenkins Modernization:** Led design and development of a ground-up Jenkins replacement using JCasC, Terraform, and Packer this brought a platform last updated in 2019 fully into IaC. The new platform self-heals, self-deploys, and performs automated quarterly plugin and platform updates gated by a two-approver review process.
- **Build Time Reduction:** Jenkins platform improvements reduced build times by **78%**, from 1.5 hours to under 20 minutes.
- **Cloud Cost Optimization:** Migrated workloads from standalone EC2 instances to ECS and Kubernetes-managed infrastructure, reducing AWS spend by **30%**.
- **Observability:** Deployed Prometheus and Grafana for centralized metrics and log aggregation across platforms; implemented severity-tiered alerting to surface actionable incidents and reduce noise for on-call team members.

Site Reliability Engineer/DevOps Engineer, Ancera

Branford/Remote, CT 2021- 2025

- **Kubernetes Expertise:** Built and maintained production-grade Kubernetes clusters for AI-powered applications, improving deployment reliability by 40%.
- **Infrastructure Automation:** Automated infrastructure provisioning using Ansible playbooks and Terraform, reducing deployment times by 30%.
- **CI/CD Pipelines:** Developed and managed CI/CD pipelines in Azure DevOps for multiple applications, incorporating security scanning, automated testing, and artifact management.
- **Monitoring & Optimization:** Implemented Prometheus and Grafana for real-time monitoring, improving issue resolution time by 25%.
- **Cloud & Cost Management:** Led Azure cost optimization initiatives, saving over \$50K annually through efficient resource allocation and scaling strategies.
- **Team Leadership:** Managed over 30 contractors across IT and software development functions.

Software Engineer, Bodangly Software

New Haven/Remote, CT 2020- 2021

- Design and program object-oriented solutions for IoT devices
- Create connection API and SDK for IoT devices to Azure Hub
- Utilized Django to develop API for connection from IoT devices to React based front end
- Wrote a C based program to create drivers for an nVidia GPU for visual processing on IoT devices
- Constructed a Vue front end for Litecoin crypto exchange website.

Software Support Specialist, V-Technologies

Cheshire, CT 2018

- Assessed complex customer inquiries and responded promptly to service requests
- Swiftly and accurately applied customer change requests
- Created guides for clients and internal support personnel
- SQLite used to send information over APIs to shipping companies such as FedEx, USPS, etc.
- Database administration in RDS environments and Python scripting to automate business functions on servers such as data ETL, business automation through timed API calls.

IT Technical Intern, *National Physician Services*

Rocky Hill, CT 2017

- Installed, maintained, and updated IT infrastructure
- Managed connectivity of hardware and software
- Created and executed drive imaging

Network Administrator/Web Designer, *Ben and Jerry's*

Canton, CT 2015-2016

- Collaborated with client to identify required network architecture
- Configured and installed local network infrastructure
- Performed website design and development

ITS Help Desk, *Eastern Connecticut State University*

Willimantic, CT 2014-2015

- Technical assistance and resolution of hardware and software problems
- Assisted and advised on installation, configuration, and performance issues
- Trained clients to utilize university systems and software

EDUCATION

Holberton School of Software Engineering, New Haven, CT

Full Stack Software Engineering
